

REMARKS

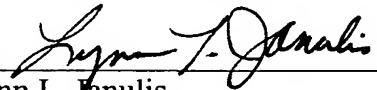

By the forgoing, the Applicants have amended the specification to include related application information. Support for new claims 63-66 is found throughout the specification and in the claims of the parent application, as originally filed. Specifically, support is found, but not limited to, pages 99-103 in the specification.

The Applicants do not intend by these or any other amendments to abandon the subject matter of any claim as originally filed, and reserve the right to pursue such subject matter in this application or related applications.

The instant amendments were made primarily to remove claim dependencies, including multiple dependencies, found in corresponding claims of parent application USSN 09/867,274, solely to minimize PTO claim fees, and not for any reason related to patentability. Claims 63-66 will be pending upon entry of the instant amendment.

Dated: October 6, 2003

Respectfully submitted,

By
